Journal of Neuroscience Methods, 34 (1990) 223–224
Elsevier

Contents of Volume 34

Number 1–3 September 1990

Foreword

Electrochemical detection, HPLC and in vivo monitoring in the biosciences
C.A. Marsden, I.A. Macdonald, M.H. Joseph and D. Perrett (U.K.) 1

Research papers

Optimization of LC apparatus for determinations in neurochemistry with an emphasis on microdialysis samples
P.T. Kissinger and R.E. Shoup (U.S.A.) 3

Dopamine concentration in the cytoplasmic compartment of single neurons determined by capillary electrophoresis
T.M. Olefirowicz and A.G. Ewing (U.S.A.) 11

Amino acid measurement by high-performance liquid chromatography using electrochemical detection
R.A. Sherwood (U.K.) 17

Measurement of the in vitro release of endogenous monoamine neurotransmitters as a means of identification of prejunctional receptors
D.N. Middlemiss and P.H. Hutson (U.K.) 23

Brain dialysis of neurotransmitters: a commentary
G. Di Chiara (Italy) 29

Microdialysis measurement of in vivo neuropeptide release
K.M. Kendrick (U.K.) 35

Detection of neuropeptide release in the central nervous system with antibody microprobes
A.W. Duggan (U.K.) 47

In vivo voltammetry with micro-biosensors for analysis of neurotransmitter release and metabolism
F. Crespi (U.K.) 53

Fast cyclic voltammetry: measuring transmitter release in 'real time'
J.A. Stamford (U.K.) 67

Brain microdialysis studies on the control of dopamine release and metabolism in vivo
G.W.A.I.S. Fairbrother and S.P. Butcher (U.K.) 73

Application of brain microdialysis to study the pharmacology of the 5-HT_{1A} autoreceptor
T. Sharp and S. Hjorth (U.K., Sweden) 83

Chronic 5-HT_2 receptor antagonist treatment alters 5-HT_{1A} autoregulatory control of 5-HT release in rat brain in vivo
E.J. Kidd, J.E. Leysen and C.A. Marsden (U.K., Belgium) 91

An in vivo microdialysis characterization of extracellular dopamine and GABA in dorsolateral striatum of awake freely moving and halothane anaesthetised rats
P.G. Osborne, W.T. O'Connor, K.L. Drew and U. Ungerstedt (Sweden) 99

Intracerebral microdialysis as a tool to monitor transmitter release from grafted cholinergic and monoaminergic neurons
P. Kalén, O.G. Nilsson, M.A. Cenci, E. Rosengren, O. Lindvall and A. Björklund (Sweden) 107

Dopamine-acetylcholine interaction in the striatum studied by microdialysis in the awake rat: some methodological aspects
B.H.C. Westerink, P. De Boer and G. Damsma (The Netherlands, Canada) 117

Application of in vivo electrochemistry to the measurement of changes in dopamine release during intracranial self-stimulation
C.D. Blaha and A.G. Phillips (Canada) 125

Mesocorticolimbic dopaminergic systems and emotional states
M. Bertolucci-D'Angio, A. Serrano and B. Scatton (France) 135

Lever pressing for food reward and changes in dopamine turnover and uric acid in rat caudate and nucleus accumbens studied chronically by in vivo voltammetry
M.H. Joseph and H. Hodges (U.K.) 143

In vivo neurochemical effects of tail pinch
M.G. Boutelle, T. Zetterström, Q. Pei, L. Svensson and M. Fillenz (U.K.) 151

The use of Doppler ultrasound in the study of fetal cardiovascular physiology
K.P. Hanretty and P.C. Rubin (U.K.) 159

New technical and clinical aspects for cerebrovascular applications of ultrasound methods
M. Hennerici (F.R.G.) 169

The sympathoadrenal system, obesity and hypertension: an overview
L. Landsberg 179
Effects of nutrient intake on sympathoadrenal activity and thermogenic mechanisms
A.V. Astrup, N.J. Christensen, L. Simonsen and J. Bülow (Denmark) 187
Effect of food intake on cardiovascular control in patients with impaired autonomic function
C.J. Mathias (U.K.) 193
5-HT neuroendocrine responses during psychotropic drug treatment: an investigation of the effects of lithium
P.J. Cowen, P.R. Cohen, S.L. McCance and K.J. Friston (U.K.) 201
Single photon emission computed tomography (SPET) of the brain
P.J. Ell (U.K.) 207
